Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 15-24, drawn to a robotic, robotic repair machine and a system, classified in class 404, subclass 84.05.
 - II. Claims 25-33, drawn to a method of efficiently repairing a road surface, classified in class 404, subclass 72.
2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of repairing a road surface as recited in group II can be practiced by another machine or system other than that recited in group I, and the apparatus in group I is not limited to the method as recited in group II.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
